

Modules to be done:

- a) Admin (50%)
- b) Franchisee
- c) Office Worker
- d) Customers

1. Admin

- **Creates, edit, delete**
franchisee
Office worker

- **View**

Customers and their data.

2. Franchisee

- **Create , update delete**
 - Customers
- Insert data of customers.
- Create invoice and fills respective forms to insert customer data into database.

Business Flow:

The franchisee will create the invoice at first, then will insert the data of the respective service through the service forms. The data will be visible to the admin and the office workers. The office workers will be able to download the documents of the respective service booked by the franchisees.
